

2ND LOSAN DRUG DELIVERY CONFERENCE ON FORMULATION TECHNOLOGIES

FEBRUARY 6TH 2018

*We make

Topics of conference

- **Nanotechnology**
 - Dosage forms
 - API utilisation and
 - Application overview
- **Hot melt extrusion**
- **Silica amorphous – drug carrier to enhance API solubility**
- **High potent API**
- **Solubilisation**

This 1-day conference will be an excellent opportunity for R&D Managers, Technology Experts and Business Development Managers who have specific interest in up-to-date formulation technologies and their special aspects in formulation and analytical development.

International experts and guest speakers from industry and academia will present relevant topics as well as case studies. Furthermore, the agenda will provide room for expert discussions and know-how exchange. Attendees will be able to directly apply their learnings from this symposium to their daily work.
